City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

SUMMARY

The City of Beverly Hills Department of Planning and Community Development obtained services in architectural history from Jones & Stokes to update the City's Historic Resources Survey (HRS) for Area 5 Commercial (see map of survey areas, next page). Phase I of the HRS was prepared in 1985-86 and included a windshield survey of 2,790 properties. Of those properties, 371 were recorded on Department of Parks and Recreation historic resources inventory forms (DPR 523 forms), and 27 of them were recorded in Commercial Area 5. The 1985-86 HRS essentially used a 50-year age criterion, and therefore evaluated very few properties constructed after 1945. In 2004, PCR Services Corp. prepared Phase II of the HRS, preparing update DPR 523 forms for the 371 Phase I properties, and preparing reconnaissance level DPR 523 forms for Area 4 Multi-Family Residence Survey. The purpose of the 2006 Phase III survey of Area 5 Commercial is to: 1) provide update DPR 523 forms on the 27 Phase I properties, and 2) conduct a reconnaissance survey of properties constructed after 1935 but before 1965.

The project methodology follows that of the reconnaissance level survey effort documented on DPR 523 forms according to California Office of Historic Preservation *Instructions for Recording Historical Resources*. Identified properties were evaluated for significance according to the criteria of the National Register of Historic Places (National Register), California Register of Historical Resources (California Register), and Title 10 of the Beverly Hills Municipal Code.

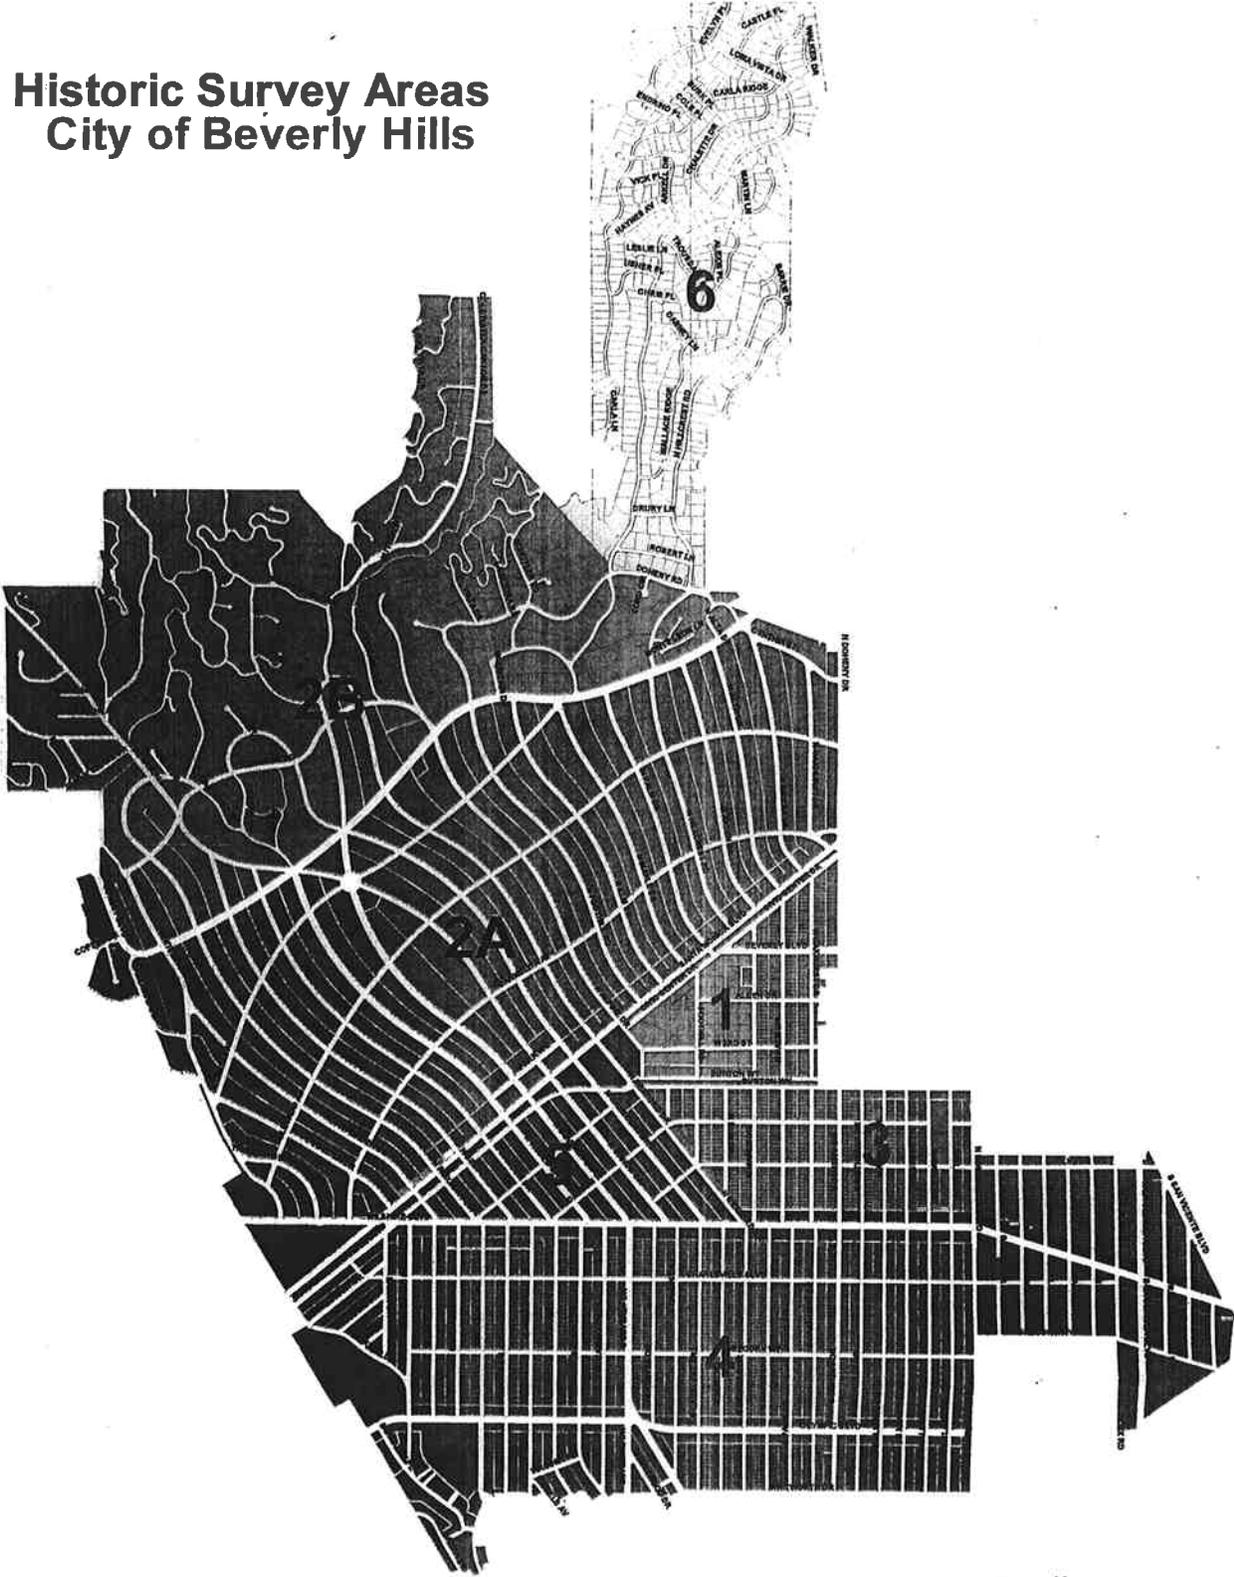

PART 1 RESULTS:

- 27 resources identified in the 1985-86 and 2004 surveys were re-evaluated
- 3 individual properties are listed in the National Register and the California Register (CHR Status Code 1S)
- 1 individual property was formally determined eligible for the National Register and is listed in the California Register (CHR Status Code 2S2)
- 11 individual properties appeared eligible for the National Register and California Register (CHR Status Code 3S)
- 1 individual property appeared eligible for the California Register (CHR Status Code 3CS)
- 7 individual properties appeared eligible for local listing (CHR Status Code 5S3)
- 4 individual properties were found not to be eligible for national, state or local criteria, including two that were demolished since the 2004 Survey was completed (CHR Status Code 6Z)

PART II RESULTS

- 60 resources not previously identified were evaluated by the reconnaissance level survey
- 8 individual resources appeared eligible for the National Register and California Register (CHR Status Code 3S)
- 11 individual property appeared eligible for the California Register (CHR Status Code 3CS)
- 3 individual properties appeared eligible for the California Register both individually and as a contributor to a historic district (CHR Status Code 3CB)
- 38 individual properties appeared eligible for the California Register as a contributor to three distinct historic districts (CHR Status Code 3CD)

Historic Survey Areas City of Beverly Hills

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

PURPOSE

The Historic Resources Survey Update and reconnaissance survey of the Area 5 Commercial Survey of the City of Beverly Hills was prepared by Jones & Stokes for the City of Beverly Hills' Planning and Community Development Department. The Historic Resources Survey Update re-evaluated 27 historical resources according to federal, state, and/or local significance. The Area 5 Commercial Survey involves the reconnaissance-level survey of all commercial properties located within Area 5 of the City (essentially the Commercial Triangle and the Wilshire Boulevard corridor) developed prior to 1965. There were 60 properties that appeared to meet federal, state, or local criteria, either individually or as contributors to one of three identified historic districts. These current survey efforts are intended to serve as a foundation for future historic resources surveys, and as a basis for land use and historic preservation decisions by City officials.

BACKGROUND

The first phase of the HRS was completed in 1985-1986 by historic resources consultants Johnson Heumann Research Associates. The survey encompassed the entire City, organized it into 6 survey areas, and documented 372 individual structures, 10 districts and thematic groupings, and 4 community design features. For Phase II in 2004, PCR Services Corporation's architectural historians updated the first phase results, and conducted a reconnaissance level survey of Area 4, the multiple family residential area south of Wilshire Boulevard. The PCR survey updated the California Historical Resource Status Codes (CHR Status Codes) according to the definitions dated December 8, 2003, by the California Office of Historic Preservation. The CHR Status Code definitions remain unchanged since December 8, 2003. While PCR updated the 1985-1986 survey results in Area 5, they were not contracted to identify properties constructed between 1945 and 1961.

PROJECT DESCRIPTION

In March 2006, the City of Beverly Hills contracted Jones & Stokes for Phase III to update the 1985-1986 and 2004 findings for Survey Area 5—Commercial. The survey was completed in June 2006. The reconnaissance historical resources survey of the Commercial Area (Survey Area 5) was conducted in a manner consistent with the established standards, including National Register Bulletin 24—Guidelines for Local Surveys: A Basis for Preservation Planning and the Secretary of the Interior's Standard and Guidelines for Identification (48 FR 44720-23) and the Office of Historic Preservation's *Instructions for Recording Historical Resources*.

Jones & Stokes provided architectural historians who meet the Secretary of the Interior's Professional Qualifications Standards to conduct the reconnaissance of the commercial buildings constructed after 1941, including Dr. Portia Lee and Daniel Paul. Jones & Stokes also provided a historic researcher who is knowledgeable in Post World War II architecture, John English. One or more of Jones & Stokes' architectural historians examined in the field each of the properties in the survey area, verified the current condition of the 27 previously surveyed

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

properties and added any additional properties that would be likely to meet the criteria for eligibility to the National Register of Historic Places, the California Register of Historical Resources, or Beverly Hills Title 10. The reconnaissance/update survey results were recorded on the California Department of Parks and Recreation Primary Form (DPR 523A 1/95).

METHODOLOGY: PHASE III

PART I. PREVIOUSLY SURVEYED PROPERTIES

For the 27 resources in Survey Area 5 that were previously surveyed in 1985-86 and 2004, a digital photograph of the current condition of the building was taken and entered into the database provided by the City so that it appears on the Primary Record in the database. The architectural historians updated the previous findings on the Continuation Sheet (DPR 523L) according to the OHP instructions, specifically mentioned important changes that may have occurred to the property since the previous evaluation. This information was recorded on the Continuation Sheet with the photo and any relevant survey update information about post-2004 alterations, if any.

PART II. NEWLY RECORDED IMPORTANT PROPERTIES

There were additional properties identified in the reconnaissance survey that were not included in the 1985-86 or 2004 surveys. These included buildings constructed after 1941 and largely included buildings designed by important architects who practiced in that era, or which appeared to contribute to a thematic grouping.

The 2006 Area 5 Commercial Survey utilized the same historic context and criteria of the 2004 survey for consistency in evaluation, however some historic context for buildings constructed in the 1950s and 1960s was expanded.

EXPANDED HISTORIC CONTEXT, 1950S AND 1960S

During the Post World War II period (1945 - 1975) a large number of medium to large-scale office buildings were erected along the commercial corridors of Beverly Hills, with the largest concentration, and the most prominent examples found on Wilshire Boulevard. These buildings were predominantly architect designed by practitioners offering a wide range of modernistic interpretations. They represent an impressive collection of designs from the period.

Contributors include modest buildings, mostly 4 to 5 stories in height that were constructed in the years immediately following World War II to the mid 1950's, and those that date from the late 1950's onward that are larger in scale, and were built with higher construction budgets. Character defining features of contributors commonly exhibited include: generous use of plate glass, exposed steel and concrete, cladding of travertine, marble, and other contemporary materials associated with Modern commercial high-rise office buildings of the period. Scale, set back and massing that responded to the street or intersection of streets where they were

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

constructed, is another identifying quality that is consistently present within the majority of the contributing buildings within this district.

Architects responsible for a number of the contributors to this district include: William Pereira, Charles Luckman, Maxwell Starkman, I.M. Pei, Victor Gruen Associates, Welton Becket and Associates, Craig Elwood, Langdon and Wilson, Edward Durrell Stone, Palmer and Krisel, and Anthony Lumsden. Worthy of particular note is the work of architect Sidney Eisenshtat, who is credited with seven of the commercial buildings along Wilshire Boulevard.

SURVEY CRITERIA

The criteria included the National Register of Historic Places, California Register of Historical Resources, and the City of Beverly Hills municipal code, Title 10, Chapter 10, Article 32. The CHR Status code definitions were used in the survey to reflect these criteria, summarized in relevant part, as follows:

- Listed in the National Register and the California Register (CHR Status Code 1S)
- Formally determined eligible for the National Register and is listed in the California Register (CHR Status Code 2S2)
- Appears eligible for the National Register and California Register (CHR Status Code 3S)
- Appears eligible for the California Register (CHR Status Code 3CS)
- Appears eligible for the California Register both individually and as a contributor to a historic district (CHR Status Code 3CB)
- Appeared eligible for the California Register as a contributor to a historic district (CHR Status Code 3CD)
- Appears eligible for local listing (CHR Status Code 5S3)
- Found not to be eligible for national, state or local criteria (CHR Status Code 6Z)

SURVEY FINDINGS

The Phase III survey findings are summarized below, and information about individual resources is included in a series of tables and then on the DPR 523 forms in Appendices A and B. The project methodology follows that of the reconnaissance level survey effort documented on DPR 523 forms according to California Office of Historic Preservation *Instructions for Recording Historical Resources*. Identified properties were evaluated for significance according to the criteria of the National Register of Historic Places (National Register), California Register of Historical Resources (California Register), and Title 10 of the Beverly Hills Municipal Code. Because the findings are based on a reconnaissance level survey, they are subject to change if further research indicates the buildings have undergone substantial alteration that was not observed in the field.

PART 1 RESULTS:

- 27 resources identified in the 1985-86 and 2004 surveys were re-evaluated
- 3 individual properties are listed in the National Register and the California Register (CHR Status Code 1S)

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

- 1 individual property was formally determined eligible for the National Register and is listed in the California Register (CHR Status Code 2S2)
- 11 individual properties appeared eligible for the National Register and California Register (CHR Status Code 3S)
- 1 individual property appeared eligible for the California Register (CHR Status Code 3CS)
- 7 individual properties appeared eligible for local listing (CHR Status Code 5S3)
- 4 individual properties were found not to be eligible for national, state or local criteria, including two that were demolished since the 2004 Survey was completed (CHR Status Code 6Z)

PART II RESULTS

- 60 resources not previously identified were evaluated by the reconnaissance level survey
- 8 individual resources appeared eligible for the National Register and California Register (CHR Status Code 3S)
- 11 individual property appeared eligible for the California Register (CHR Status Code 3CS)
- 3 individual properties appeared eligible for the California Register both individually and as a contributor to a historic district (CHR Status Code 3CB)
- 38 individual properties appeared eligible for the California Register as a contributor to three distinct historic districts (CHR Status Code 3CD)

HISTORIC DISTRICTS UPDATE

Beverly Hills Neighborhood Theatres Thematic Grouping (5S3), 2 remaining contributors

The Beverly Hills Neighborhood Theatres Thematic Grouping was given a 5S3 NRHP status code by the City as a result of the Phase I survey in 1986. The OHP, however, did not agree that the theatres constituted a thematic grouping and, instead, evaluated each resource individually. Under the Phase II survey process in 2004, the City's original 5S3 status code for the grouping was reaffirmed because the four remaining theatres were the only remaining examples of pre-World War II theatres in Beverly Hills with a high degree of integrity. Since the 2004 survey, however, the Beverly Theater at 206 N. Beverly Drive and the Regina Wilshire Theatre at 8554 Wilshire Boulevard were demolished, leaving only the Fox Wilshire Theatre at 8444 Wilshire and the Elite Theatre at 9036 Wilshire Boulevard. As a result, it is the recommendation of the Phase III survey in 2006 that the Thematic Grouping no longer has a sufficient number of representative buildings, and that the two remaining theaters be evaluated only as individual resources.

Wilshire Boulevard Specialty Stores Thematic Grouping (5S3), 3 potential contributors

The Wilshire Boulevard Specialty Stores Thematic Grouping was given a 5S3 NRHP status code by the City in 1986. The OHP, however, did not agree that the stores constituted a thematic grouping and, instead, evaluated each resource individually. Under the Phase II survey process in 2004, the City's original 5S3 status code for the grouping was reaffirmed because the three contributing multi-story commercial buildings are the only remaining examples of pre-World War II department stores in Beverly Hills. The Phase III survey process in 2006 confirms the Phase II findings, because no substantial alterations or loss of contributing buildings has occurred since that time.

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

The Phase III survey in 2006 identified three thematic groupings:

Art Deco Moderne Buildings, 7 contributors

Commercial Development in the downtown core in the decades of the 1930s and 1940s reflected the growing sophistication of the city. Retail and service enterprises in the triangle sought to enhance Beverly Hills reputation as the city for fine shops, restaurants and theaters. The buildings of the district were mostly low-rise and their architecture demonstrated a progressive interest in modern styles, particularly Art Deco and Streamline Moderne. Since both styles were associated with the development of trends in modern art, they were highly suitable for the cultivated image of the city. Many of these early buildings were small and mainly low rise, yet most utilized the decorative elements of the styles such as roof coping, balustrades, horizontally grooved pillars and geometric motifs to create the Beverly Hills ambience. The Streamline variant of Moderne also appealed to builders of the period who adapted the smooth surfaces, curved corners and horizontal massing of the style to the Beverly Hills streetscape.

Regency Revival Buildings, 8 contributors

The Hollywood Regency style was included in architectural context of the 2004 Phase II Survey report. Sophisticated Revival styles were prominent in the commercial architecture of the 1930s and a brief period following the war. Beverly Hills became associated with the development of the Regency Revival style. While the design had a larger influence in residential architecture, designers of commercial buildings in the triangle also adapted it freely to building purposes. Few buildings remain that can be clearly identified with the style since building and business owners frequently updated their buildings and successive alterations generally removed character-defining features of the earlier styles. Two buildings selected for this district, built before the war or shortly thereafter, convey the elegance and gracious expression that was characteristic of the well-known interior designers working in the city. A somewhat different Beverly Hills Regency group noticeable in the city is a collection of larger brick structures, often medical buildings. The designers of these buildings 3-4 stories in height, joined early 19th century French and English Revival elements with brick cladding on elevations and facades to create a stronger decorative emphasis.

Post World War II Commercial Buildings, 28 contributors

During the Post World War II period (1945 to 1975) an impressive collection of medium to large-scale office buildings was erected within Beverly Hills. These buildings were predominantly architect designed by practitioners offering a wide range of modernistic interpretations. Buildings include modest examples, mostly 4 to 5 stories in height, constructed after World War II, from the late 1940's to the mid 1950's. Later structures were larger in scale, and were built with higher construction budgets. Character defining features include: generous use of plate glass, exposed steel and concrete, cladding of travertine, marble, and other contemporary materials associated with Modern commercial highrise office buildings of the period. Scale, set back and massing that responded to the street or intersection of streets where they were constructed, is another identifying quality that is consistently present within the majority of the contributing buildings in this district. Architects responsible for a number of the

City of Beverly Hills Commercial Area 5-Historic Resources Survey Update

contributors to this district include: William Pereira, Charles Luckman, Maxwell Starkman, I.M. Pei, Victor Gruen Associates, Welton Becket and Associates, Craig Elwood, Langdon and Wilson, Edward Durrell Stone, Palmer and Krisel, and Anthony Lumsden. Worthy of particular note is the work of architect Sidney Eisenshtat, who is credited with seven of the contributing buildings along Wilshire Boulevard.

The following tables and DPR 523 forms provide information on the 27 properties previously surveyed in 1985-86 and 2004 and the additional 60 properties identified in 2006.

Page 1 of 1 Resource Name or # *Beverly Theater*

Continuation Update

P2. Location: *206 North Beverly Dr.*

B10 Significance:

The Beverly Theater was demolished since it was last evaluated in the 2004 survey. Originally evaluated in the 1985-1986 survey as significant as a Moorish Revival style building with Modern architectural elements, it no longer would be eligible for local listing or designation. As a result, the previous CHR status code of 5S3 is changed to 6Z.

Continuation Update

P2. Location: *357 North Beverly Dr.*

B10 Significance:

Between the 1985-1986 and 2004 survey evaluations, the storefront windows were altered. The window openings, glazing, and surrounds were replaced. However, the window modifications have not compromised the overall Spanish Colonial Revival architectural style of the commercial building. Therefore, the building, which is in good condition, remains individually eligible for local listing or designation. There have been no major modifications since the 2004 evaluation.

Page 1 of 1 Resource Name or # *Beverly Hills City Hall*

Continuation Update

P2. Location: *450 North Crescent Dr.*

B10 Significance:

There were extensive additions to the secondary (south and east) elevations of City Hall between the 1985-1986 and 2004 survey evaluations. However, the primary (west) elevation and west wing remain intact, in good condition, with a high degree of integrity. There do not appear to have been major modifications since the 2004 survey. Therefore, the building remains individually eligible for National Register, California Register, and local listing or designation under criteria related to events that have made a significant contribution to the broad patterns of the City's history, associations with the lives of historic personages, and for architectural significance.

P5b Description/Date of Photo: *West and south elevations, looking northeast/March 7, 2007*

P2. Location: *9441 Santa Monica Blvd.*

B10 Significance:

Between the 1985-1986 and 2004 survey evaluations, alterations were made to the frames and glazing of windows on both stories. Metal-framed windows and non-original glazing replaced the multi-pane casements topped by transoms that previously punctuated the second story elevation. Similarly, the frames and glazing of the storefronts are no longer original, particularly those storefronts located on the southwest corner associated with the Johnny Rockets restaurant. Nonetheless, because the modifications are in keeping with the vernacular commercial style of this late 1920s building, and the elaborately molded arched entrances remain unaltered, the building remains eligible for local listing or designation.

Continuation Update

P2. Location: 9501 Santa Monica Blvd.

B10 Significance:

Between the survey evaluations of the property in 1985-1986 and 2004, alterations occurred to the frames and glazing of windows on the fourth story. Metal-framed windows and non-original glazing have replaced the wood-framed casements that previously punctuated the fourth story elevation. Fenestration on the second and third floors appears to be unchanged since the last survey, however, storefronts had already been altered by 1985-1986. Nonetheless, the modifications do not greatly detract from the vernacular commercial style of this mid-1920s building, therefore, the building remains eligible for local listing or designation. No major modifications have occurred since the 2004 survey.

Page 1 of 1 Resource Name or # *Fox Wilshire Theatre*

Continuation Update

P2. Location: *8444 Wilshire Blvd.*

B10 Significance:

The Wilshire Theatre building designed by renowned architect S. Charles Lee is primarily unaltered since the property was evaluated in the 1985-1986 survey and re-evaluated in the 2004 survey. The major exception is the street level main entrance area where metal-framed entry doors and glazing have replaced the original entrance elements. Most of the storefronts and visible elevations above the ground floor level appear unchanged since the previous survey. Therefore, because the building is an excellent example of a motion picture theatre designed in the Art Deco style, is associated with a master architect, and exhibits an overall high level of physical integrity, it appears to be individually eligible for National Register, California Register, and local listing or designation. Additionally, the building remains a contributor to a potential historic district defined as the Beverly Hills Neighborhood Theatres Thematic Grouping that is eligible for local listing or designation.

* P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

This appears to be the Hilton Office building that was designed and constructed for Hilton Hotels Inc., during the same period when the Beverly Hilton was being constructed nearby. It appears to be eligible for listing in the National Register under Criterion C, for its architecture, designed by a master architect, Charles Luckman, and under Criterion A for its association with the Hilton Corporation. It may also be found to be eligible under Criterion B, for its association with Conrad Hilton.

Architect: Luckman, Charles

* P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
The J.W. Robinson's Department Store in Beverly Hills opened to the public on February 13, 1952. It was completed at a cost of \$6,000,000, and was designed by the architectural firm of Pereira and Luckman with Charles O. Matcham architect. Renowned industrial designer Raymond Lowey laid out the interior scheme for the three and four level, 238,000 square foot store building.

Pereira and Luckman were one of the most prominent and prolific architectural firms practicing in Los Angeles during the Post World War II era. They were one of the "big five" architectural firms including Welton Becket and Associates, A.C. Martin and Associates, Daniel, Mann, Johnson and Mendenhall (DMJM), and Paul R. Williams. Work by the firm and subsequently by William Pereira Associates includes a number of high profile buildings including CBS Television City, 1952, The Unocal Building, 1958, Marine Land of the Pacific, 1958, Occidental Petroleum Building in downtown Los Angeles, 1965, and the Transamerica Pyramid in San Francisco, in the late 1960's.

The building appears to be eligible for the National Register under Criteria C, as an important example of the work of a master architectural firm, Pereira and Luckman, and as an important example of Post World War II Modern design in a large commercial department store building.

*NRHP Status Code 3CD

*Resource Name:
Art Deco/Moderne District

D1. Historic Name: _____

D2. Common Name:

*D3. **Detailed Description** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.): This district is a

Commercial Development in the downtown core in the decades of the 1930s and 1940s reflected the growing sophistication of the city. Retail and service enterprises in the triangle sought to enhance Beverly Hills reputation as the city for fine shops, restaurants and theaters.

The buildings of the district were mostly low-rise and their architecture demonstrated a progressive interest in modern styles, particularly Art Deco and Streamline Moderne. Since both styles were associated with the development of trends in modern art, they were highly suitable for the cultivated image of the city. Many of these early buildings were small and mainly low rise, yet most utilized the decorative elements of the styles such as roof coping, balustrades, horizontally grooved pillars and geometric motifs to create the Beverly Hills ambience. The Streamline variant of Moderne also appealed to builders of the period who adapted the smooth surfaces, curved corners and horizontal massing of the style to the Beverly Hills streetscape.

*D4. **Boundary Description** (Describe limits of district and attach map showing boundary and district elements.):

The limits of the discontinuous boundary are the commercial areas within the City Limits of Beverly Hills, and specifically the Area 5 Survey boundaries. When other areas of the City are surveyed in the future, it is possible that additional contributors to this district may be identified.

D5. **Boundary Justification:**

D6. **Significance:** Theme Art Deco/Moderne Architecture

Area City of Beverly Hills

Period of Significance 1926 - 1945

***NRHP Status Code** 3CD
***Resource Name:**
 Post World War II Modern Commercial Office Building District

D1. Historic Name: _____

D2. Common Name: _____

***D3. Detailed Description** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.): This district is a

During the Post World War II period (1945 to 1975) an impressive collection of medium to large-scale office buildings was erected within Beverly Hills. These buildings were predominantly architect designed by practitioners offering a wide range of modernistic interpretations.

Buildings include modest examples, mostly 4 to 5 stories in height, constructed after World War II, from the late 1940's to the mid 1950's. Later structures were larger in scale, and were built with higher construction budgets. Character defining features include: generous use of plate glass, exposed steel and concrete, cladding of travertine, marble, and other contemporary materials associated with Modern commercial high-rise office buildings of the period. Scale, set back and massing that responded to the street or intersection of streets where they were constructed, is another identifying quality that is consistently present within the majority of the contributing buildings in this district.

Architects responsible for a number of the contributors to this district include: William Pereira, Charles Luckman, Maxwell Starkman, I.M. Pei, Victor Gruen Associates, Welton Becket and Associates, Craig Elwood, Langdon and Wilson, Edward Durrell Stone, Palmer and Krisel, and Anthony Lumsden. Worthy of particular note is the work of architect Sidney Eisenshtat, who is credited with seven of the contributing buildings along Wilshire Boulevard.

***D4. Boundary Description** (Describe limits of district and attach map showing boundary and district elements.):
 The district is predominantly located along the Wilshire Boulevard Corridor, with a few examples located within the downtown commercial triangle.

The limits of the discontinuous boundary are the commercial areas within the City Limits of Beverly Hills, and specifically the Area 5 Survey boundaries. When other areas of the City are surveyed in the future, it is possible that additional contributors to this district may be identified.

***D5. Boundary Justification:**

D6. Significance: **Theme** Post World War II Modern Commercial Architecture, subset Office Buildings.
Area City of Beverly Hills
Period of Significance 1945 - 1979
Applicable Criteria _____ (Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

A certain number of the contributing buildings within the district have lost some integrity due to storefront alterations and re-modeling. However, within the upper floors, character defining features and original materials remain largely intact, conveying the original design intent of the building and architect. Many of the contributors are virtually unaltered from the ground up. Therefore, this district retains a relatively high degree of overall integrity.

Page 2 of 2 *Resource Name or # (Assigned by recorder)
 *Recorded by: John English and Portia Lee *Date 06/09/2006 Continuation Update

The district appears to be eligible for listing in the California Register under Criterion 3, as a substantial, and clearly identifiable grouping of buildings that exhibit a high degree of quality in their architectural design, and, for the importance of the individual architects that define the Modernist aesthetic of the group.
